

NOTICE: This application form is authorized by section 283.37, Wis. Stats., and Chapters NR 151 and 216, Wis. Adm. Code. Personally identifiable information on this form may be used for other program purposes and may be made available to requestors under Wisconsin's Public Records laws and be posted on the Department's internet site.

Instructions: Complete the following for all permit applications. If additional space is needed to respond to a question, attach additional pages. Provide descriptions below that explain the program activities that you expect to develop and implement to comply with the Municipal Separate Storm Sewer System (MS4) general permit (<http://dnr.wi.gov/org/water/wm/nps/stormwater/muni.htm>). Section 3 of the MS4 general permit contains the compliance schedules that direct when the individual program activities need to be developed and submitted to the Department for review. The detailed programs that are developed and submitted to the Department for review may deviate from the program activities described below if necessary. The descriptions provided below are necessary for the Department to verify that the municipality's program activities comply with the permit.

Section I: Applicant Information

Name of Municipality
Town of Dunn

Mailing Address

4156 County Road B

City

McFarland

State

WI

Postal Code

53558

County(s) in which Applicant is located

Dane

Type of Municipality: (check one)

☐ County

☐ City

☐ Village

☒ Town

☐ Other (specify)

Section II: Local Contact Information (check one):

Name of Municipal Contact Person
Rosalind Gausman

Title

Town Clerk/Treasurer

Mailing Address

4156 County Road B

City

McFarland

State

WI

Postal Code

53558

E-mail address

rgausman@town.dunn.wi.us

Telephone Number (include area code)

608-255-4219 (x 207)

Fax Number (include area code)

608-835-5700

Section III: Water Quality Concerns

Yes	No	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Does any part of the MS4 discharge to an outstanding resource water (ORW) or exceptional resource water (ERW) listed under s. NR 102.10 or 102.11, Wis. Adm. Code? (An unofficial list of ORWs and ERWs may be found on the Department's Internet site at: http://dnr.wi.gov/org/water/wm/wqs/)
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Does any part of the MS4 discharge to an impaired waterbody listed in accordance with section 303(d)(1) of the federal Clean Water Act, 33 USC § 1313(d)(1)(C)? (A list of Wisconsin impaired waterbodies may be found on the Department's Internet site at: http://dnr.wi.gov/org/water/wm/wqs/303d/303d.html)

Section IV: Area and Population Within the MS4

Yes	No	
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Is the MS4 within an "Urbanized Area" as defined by U.S. EPA? (See http://www.epa.gov/npdes/pubs/fact2-2.pdf)

If no, skip the rest of this section and continue to Section V. If yes, estimate the area served by and the population within the MS4 in an Urbanized Area (UA).

(Urbanized Area maps are available on the EPA web site at: <http://cfpub1.epa.gov/npdes/stormwater/urbanmaps.cfm>)

Total municipal area (in square miles):

34.4

Total municipal population (in year 2000):

5270

MS4 service area within Urbanized Area (in square miles):

3.615

Municipal population within Urbanized Area (in year 2000):

2879

Section V: Potential Permit Exemption

Yes	No	Section NR 216.023, Wis. Adm. Code, allows certain MS4s that have less than 1000 people residing in an urbanized area to be waived from having to obtain municipal storm water permit coverage.
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Do you believe that the MS4 may be eligible for this potential exemption?

Section VI: Summary of Municipal Storm Water Program Activities

Describe the programs or activities the municipality is doing or will do to comply with the requirements of the MS4 general permit. Attach additional pages if necessary.

A. Public Education and Outreach

Describe the public education and outreach program activities that the municipality will implement to comply with section 2.1 of the MS4 general permit.

The Town of Dunn (Town) does not currently have a program in place designed to meet the requirements of section 2.1 of the MS4 general permit. In order to meet the requirements of the general permit (and section 216.07(1) of State Admin. Code) the Town will place a pre-written article in our bi-annual newsletter to Town residents describing the detrimental impact associated with storm water pollution. This article will also describe simple activities that the Town residents can perform to reduce storm water pollution such as picking up pet waste, on-site composting, hazardous waste disposal etc. We will place this article on the Town website.

The Town will also place storm water pollution prevention brochures in the Town Hall for resident' s use.

Dane County has focused their efforts to reduce storm water pollution county-wide by implementing a public education and outreach program to increase the awareness of storm water pollution impacts on waters of the state to encourage changes in public behavior to reduce such impacts. This effort has greatly increased the general knowledge of stormwater pollution through the " MYFAIRLAKES" campaign. The Town residents are exposed to this multi-media advertising campaign through radio advertisements, television commercials and other outlets concerning stormwater pollution. We will provide a link to the " MYFAIRLAKES" web-site on the Town web-site.

The Town will insert articles into our annual newsletter, modify our web-site and place storm water brochures in Town Hall starting in 2007.

B. Public Involvement and Participation

Describe the public involvement and participation program activities that the municipality will promote to comply with section 2.2 of the MS4 general permit.

The Town of Dunn (Town) does not currently have a program in place designed to meet the requirements of section 2.2 of the MS4 general permit. In order to meet the requirements of the general permit (and section 216.07(2) of State Admin. Code), the Town will add a discussion item under the " new Business" portion of the annual Town Meeting describing the Storm water Permit Terms and Conditions. The public is encouraged to attend our annual meeting and provide input into any Town activity listed on the agenda. At our monthly Town Board meetings, the public is given time to speak about anything not on the agenda.

C. Illicit Discharge Detection & Elimination

Describe the illicit discharge detection and elimination program authority and activities that the municipality will develop and implement to comply with section 2.3 of the MS4 general permit.

The Town of Dunn (Town) does not currently have a program in place designed to meet the requirements of section 2.3 of the MS4 general permit. Since the Town' s urbanized area is entirely comprised of residential and agricultural land use draining to above-ground ditches, the Town will not inspect for illicit discharge connections.

The Town will review the existing legal authority to control stormwater discharges into the MS4. If changes are needed to increase the Town's legal authority, we will enact ordinance modifications. We will also review the existing County ordinances to determine if legal authority exists at the county level to control stormwater discharges.

D. Construction Site Pollution Control

Describe the construction site pollutant control program authority and activities that the municipality will develop and implement to comply with section 2.4 of the MS4 general permit.

Construction Site Pollution Control is regulated and enforced by the County of Dane (County) within the Town of Dunn (Town). The County adopted a Construction Site Erosion Control Ordinance (Chapter 14) effective August 22, 2002, and was amended in fall 2005. The ordinance contains references to DNR technical standards and specifications, performance standards, inspection and enforcement authority, and enforcement mechanisms that are used to obtain compliance. On March 3, 2006 the WDNR approved the county ordinance to be comparable to the WDNR model ordinance.

The County intends to continue to administer and enforce the current Erosion Control Ordinance for the Town. This form of administration allows for Town input to the erosion control process without being required to adopt a local ordinance.

E. Post-Construction Site Storm Water Management

Describe the post-construction storm water management program authority and activities that the municipality will develop and implement to comply with section 2.5 of the MS4 general permit.

Post-construction Site Storm water Management is regulated and enforced by the County of Dane (County) within the Town of Dunn (Town). The County adopted a Storm Water Management Ordinance (Chapter 14) effective August 22, 2002, and was amended in fall 2005. The ordinance contains references to DNR technical standards and specifications, post-construction performance standards, inspection and enforcement authority, and long-term maintenance requirements. On March 3, 2006 the WDNR approved the county ordinance to be comparable to the WDNR model ordinance.

The County intends to continue to administer and enforce the current Storm Water Management Ordinance within the Town. This form of administration allows for Town input to the storm water management in their respective area without being required to adopt a local ordinance. The Town has no intention to adopt a local ordinance, at this time.

F. Pollution Prevention

Describe the pollution prevention program activities that the municipality will implement to comply with section 2.6 of the MS4 general permit.

The Town of Dunn (Town) does not currently have a program in place designed to meet the requirements of section 2.6 of the MS4 general permit. Many portions of section 2.6 do not apply to the Town due to our large lot sizes, residential land use and grassed swale drainage MS4. In order to meet standards of this section (and section 216.07(6) of State Admin. Code) the Town will develop and implement a minimal pollution prevention program. Listed below are the standards of section 2.6 with the Town's response noted.

1. Routine inspection and maintenance of municipally owned or operated structural stormwater management

facilities to maintain their pollutant removal operating efficiency. The Town will inspect and repair our grassed swale/sediment basin stormwater management facilities within the urbanized area annually.

2. Routine street sweeping and cleaning of catch basins with sumps where appropriate. Not applicable to Town because street sweeping and catch basins cleaning is not effective without curb and gutters. As noted above, the Town doesn't have any curb and gutters within the urbanized area.
 3. Proper disposal of street sweeping and catch basin cleaning waste. Not applicable to Town because no street sweeping or catch basin cleaning occurs (see note 2 above.)
 4. Road salt or other deicers are applied at no greater rate than necessary to maintain public safety. The Town will continue to apply road salt at the rate necessary to maintain public safety. A mixture of sand/salt is also used when conditions warrant it.
 5. Proper management of leaves and grass clipping, which may include on-site beneficial reuse as opposed to collection. Not applicable to Town because Town does not pick up leaves/grass clippings and does not have curb and gutter. The Town encourages residents to compost lawn/garden material on-site and offers a designated area for compost pickup.
 6. Storm water pollution prevention planning for municipal garages, storage areas and other sources of storm water pollution from municipal facilities. Not applicable to Town because no municipal garages, storage areas or other sources of storm water pollution exist within the urbanized area. The Town's salt storage area is under cover at all times and not located within the urbanized area.
 7. Application of lawn and garden fertilizers on municipally controlled properties, with pervious surfaces over 5 acres each, in accordance with a site specific nutrient application schedule based on appropriate soil tests. Not applicable to Town because Town does not apply fertilizer/herbicide to municipally controlled properties.
 8. Education of appropriate municipal and other personnel involved in implementing this program. Town will educate road salt applicator to avoid over use of road salt. Town staff also attend Dane County Highway training annually.
 9. Measures to reduce municipal sources of storm water contamination within source water protection areas. Not applicable to Town because no source water protection areas are located with urbanized area.
-

The Town will submit the proposed pollution prevention program to the Department within 24 months of the start date of permit coverage. The pollution prevention program will be implemented within 30 months of the start date.

Section VII: Certification

Certification: I hereby certify that I am an authorized representative of the municipality that is the subject of this application for general permit coverage, and that the information provided is true and complete, to the best of my knowledge. I understand that Wisconsin law provides severe penalties for submitting false information.

Authorized Representative Name <i>Rosalind Gausman</i>	Title <i>Clerk Treasurer</i>
Signature <i>Rosalind Gausman</i>	Date Signed <i>06/02/06</i>
